# The Collabaro workflow

## Create

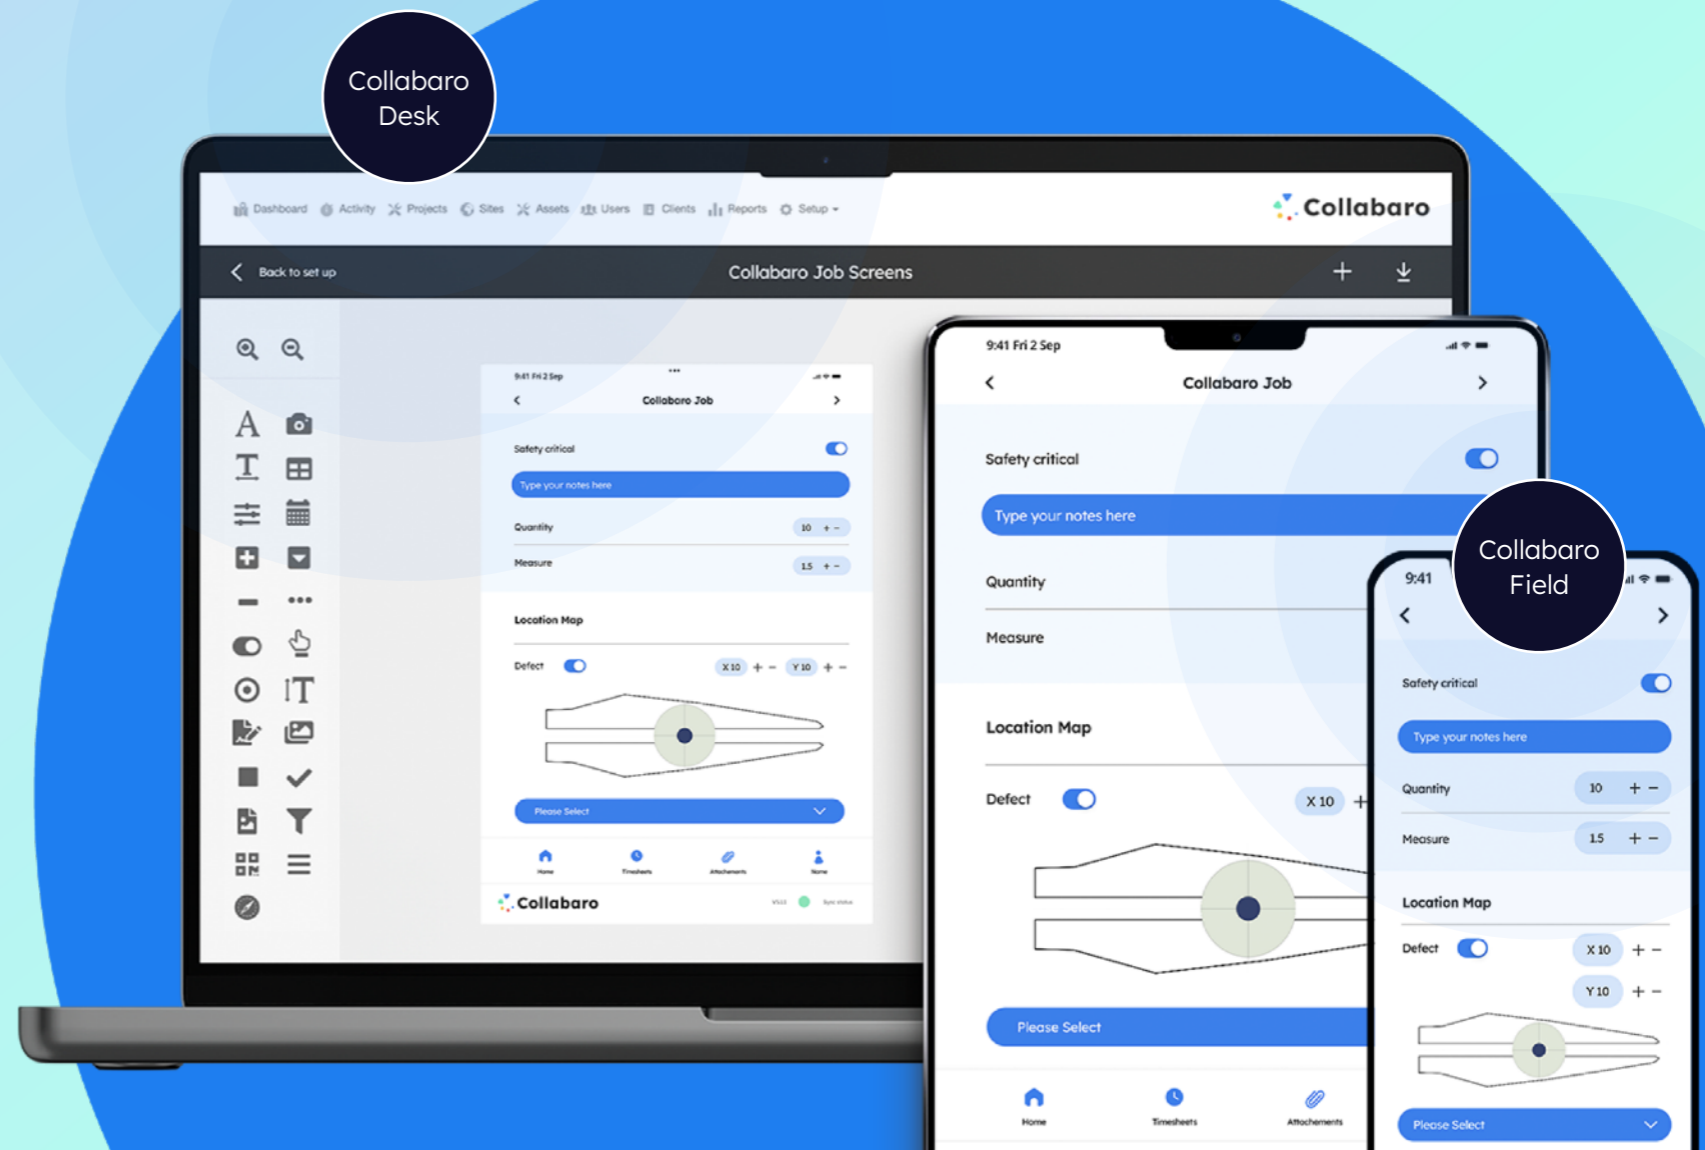

Capture the data you need from technicians in the report format you want for your customer

## Collect

Collect data on tablets or phones, with or without a network connection

## Deliver

Merge field data with a report template to produce a professionally formatted report in seconds

# Benefits explained

## Work on or offline

As data from the field is collected, all images, notes, task statuses and parts records are stored locally, automatically updating the web app via wifi or mobile data. If the device has no signal the data will remain local until a connection is re-established, providing great location flexibility.

## Real-time data capture

Get real-time access to asset test statuses and historic inspection data. Maintain data accuracy by continual updates between the field and desk app. Real time information empowers your team to make confident decisions with a clearer operational overview.

## Automated reporting

Field data is automatically inserted into the correct section of a pre-formatted, custom, report template. The outcome is a sophisticated client report produced as a printable PDF in minutes. Reports no longer need to be written by field personnel, greatly improving their performance, time management, overall job satisfaction and error reduction.

## Compliance assurance

Collabaro ensures that your field service professionals follow compliance-driven, pre-work checklists and risk assessments. A digital signature is required to acknowledge their understanding and confirm they are fit and well enough to perform their daily duties. Only once the individual has completed and signed the mandatory compliance checklists will they be able to continue with their main tasks. This data is recorded and stored alongside the job data, providing you with an accurate safety and compliance audit trail.

## System integrations

Connect your existing ERP, CRM or finance system using our REST API, and benefit from seamless integration, faster workflows, and up-to-date information across all your business tools.

Recent integrations include Microsoft Business Central, Microsoft Power BI (Business analytics data), Salesforce, Webfleet Fleet Management (TomTom vehicle tracking) and Ciphir HR software.

## Dedicated support desk

Don't get caught up in an automated call handling system, speak directly to someone with an in-depth knowledge of Collabaro to get the answers you need.

We have detailed guides, training videos and a knowledge base available within the platform. All questions are tracked, categorised and reported to compare with agreed SLAs that are reviewed regularly to ensure our service meets your expectations and needs.

# Market leader GEV Wind Power have grown their business rapidly using Collabaro

David Fletcher | Managing Director | GEV Wind Power

“We started trialling Collabaro at several sites in 2015. The idea was to replace our manual administrative reporting processes, which were causing us real challenges across the business – Collabaro helped us standardise, automate and remove the errors in our reporting across the different aspects of our operation. Manual reporting and general administration were the biggest frustration for most of our technicians, so we removed them. The ROI calculation was straightforward. The control that Collabaro gives us allows us to enforce work steps to demonstrate compliance to our customers. Collabaro was key in enabling us to expand and grow our business from 15 or 20 Blade technicians to over 400 and still growing.”

# Transform your future workflow, **book a demo!**

Let us demonstrate how Collabaro could help you process more jobs without increasing back office administration.

If you are ready to take the first step on your journey to business transformation, **simply get in touch.**
